

**IMPORTANT
AQUATICS
UPDATE!**

Temporary Pool Closure

Northwestern Medicine Lake Forest Health & Fitness Center pools will be closed from:

Monday, July 6, through Sunday, September 6

The pools will reopen on **Monday, September 7.**

To better serve you, we are upgrading to a state-of-the-art UV Defender® Regenerative Media Filter for our lap and therapy pools. This combined system will offer superior water filtration and deactivation of microorganisms, such as bacteria and viruses.

We will be the only fitness center in the area to have this combined system.

We apologize for the inconvenience and appreciate your patience. Please, direct any questions to the Member Services Desk or call 847.535.7060.

Defender® Regenerative Media Filter:

Achieves the highest quality of water by removing particles down to 1 micron, which is 20-30 times finer than our current sand filters

Offers unsurpassed water quality

Achieves turbidity to levels better than those required for drinking water

Lowers our carbon footprint through the combination of water, fuel and chemical savings

Is unique to our facility in all of Lake County

UV disinfection performance:

Helps protect against illnesses caused by microorganisms that are unaffected by chlorine

Improves air quality resulting from the reduction of chloramines, which are chlorine by products that cause skin and eye irritation as well as respiratory illnesses
